-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on March 31, 2004 was considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Maki et al. US 6,270,106.

Maki et al. disclose an all-terrain vehicle comprising a frame 10; a powertrain unit comprising the engine 20, transmission 22, and associated drive components; and a body cover. See Figure 1. The power train unit is operatively attached to the frame 10 and has an operation brake pedal extending outwardly from a side portion of the power train unit. See Figures 1 and 7; column 4, lines 46-53; and note the position of aperture

Art Unit: 3618

49' and the ability of the brake pedal to extend through the aperture. The body cover covers the frame 10 and comprises a running board apparatus 30'. See Figures 1 and 7 and column 4, lines 46-49. The running board apparatus 30' comprises a running board main body 34', 40', 50' for placement on a side of the powertrain unit. See column 4, lines 46-49. The running board main body comprises a step portion 40' adapted to support a foot of a rider thereon. See Figure 7. A partition plate 48' is disposed between the engine and the step portion and has an insertion aperture 49' formed therein. See Figure 7. The insertion aperture 49' allows an end portion of the operation pedal to extend through the aperture and the insertion aperture extends along the partition plate in both a front-rear direction and an upper-lower direction. See Figure 7 and column 4, lines 49-53.

Allowable Subject Matter

Claims 2, 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not disclose, teach, or suggest the slot, as defined in claims 2 and 5, or the stepped structure, as defined in claims 3 and 6, in combination with the claimed step portion and partition plate.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knurr et al., Hisada, Mizuta, Johnson et al., Yao, Takahashi et al., and Davis et al. disclose running board arrangements. Hosaka et al. and Miller disclose vehicle plate structures with pedal accommodating apertures.
